About AIBO

Privacy Defender

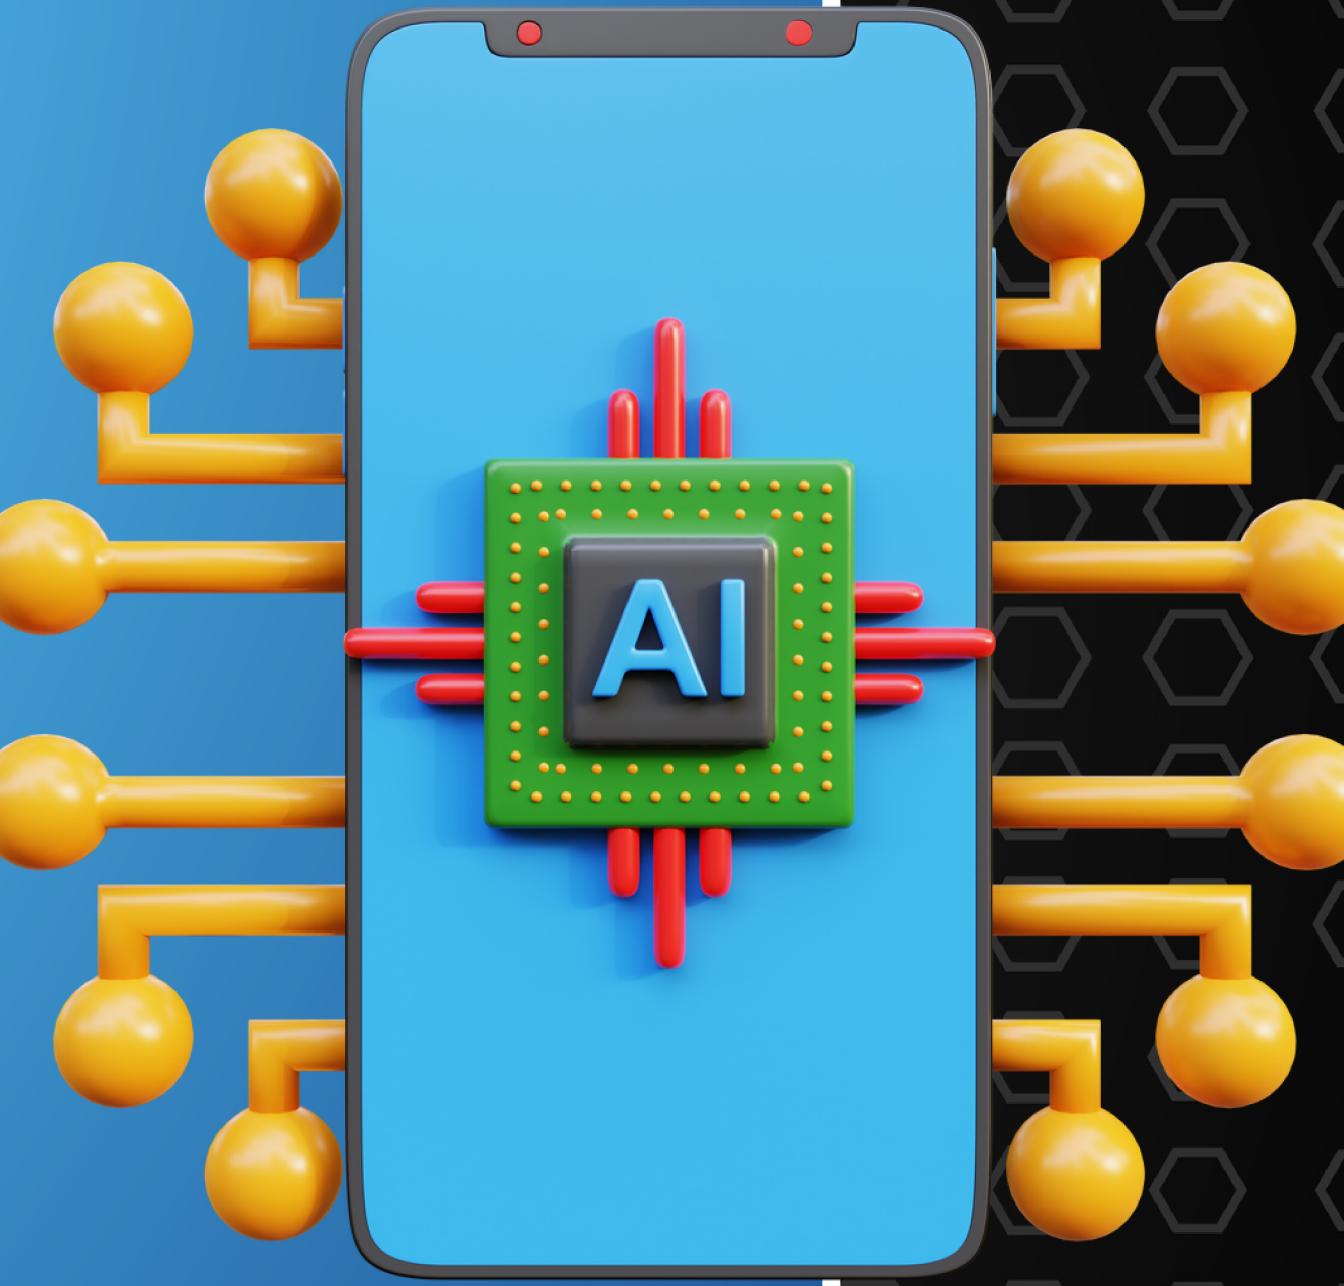

AIBO leverages end-to-end encryption technology to ensure your conversations remain private and secure. The security of your chat data is our top priority.

Blockchain Encyclopedia

Powered by cutting-edge AI technology, AIBO collects and analyzes trending topics and transaction data on the blockchain. This will empower you with unparalleled insights into the ever-evolving blockchain landscape.

Smart Trading Assistant

AIBO's intuitive and user-friendly interface makes it easy for anyone to get started, regardless of their experience or expertise. With AIBO, you can seamlessly access all the trading tools you need to make informed investment decisions, all in one place.

Technical Architecture

Matrix + Synapse

Enables decentralized and secure transmission of chat data and connects to multiple social apps, such as Telegram or Discord

Large-scale Language Model

Empower user intent analysis and dialogue management, store user memories, and generate personalized responses for users.

On-chain Aggregators

Identify optimal trading paths and provide users with the best trading services.

Business Loop

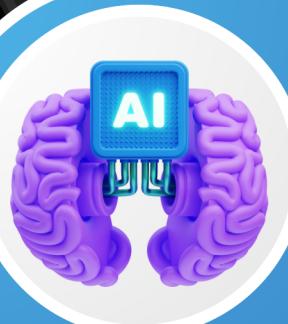

Customer acquisition

- Utilize Web2 users' familiar chat tools, such as Telegram, as a medium for promotion.
- Participate in Web3 community events to improve project awareness.

Customer retention

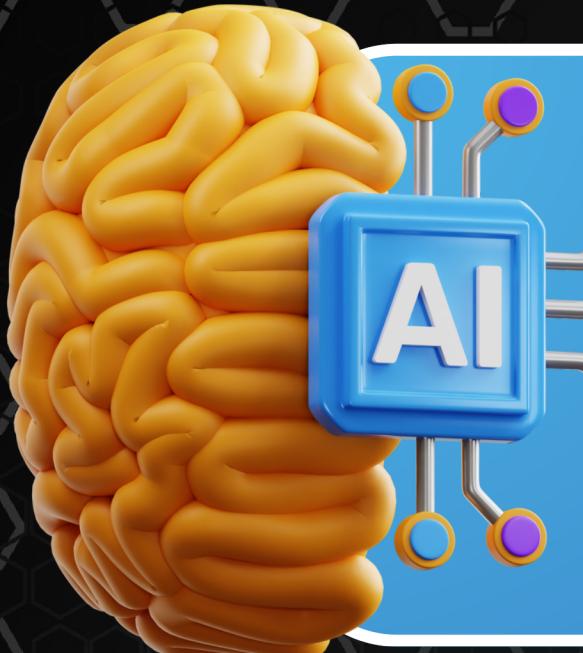

- Cultivate user habits through AI chatbot features
- Generate customized Albots by continuously learning from chat content and user habits.

Customer conversion

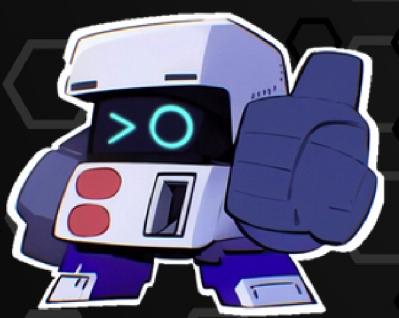

- Achieve user value conversion through in-chat transactions.
- Provide a safe and reliable trading environment to ensure the security of user assets.
