

ELEVATRIX

Codeless, seamless, limitless.
Build for creators.

THE PROBLEMS

The NFT market is rapidly merging with the innovative direction of art and IPs, and the market is predicted to reach a total sales volume of \$231 billion by the year 2030.

However, high cost of entry presents a significant challenge in realizing the full potential of this growing market.

Example:

*Average cost of using freelancers you manage - \$23,274
Outsourcing entire tasks to full-service development houses - \$42,500 - \$185,000*

“I’m thrilled to be a client of ELEVATRIX. The efficiency and convenience of the platform streamlined the entire process, enabling me to focus on my creative vision rather than getting buried in technical complexities. Highly recommended! ”

About Us

ELEVATRIX, the cutting-edge zero coding platform for NFT generation and deployment. We pave the way for creators to enter the NFT space with low costs and low threshold.

WHY APTOS

1.

With the ability to handle up to 160,000 transactions per second, creators can mint, trade, and transfer NFTs at an incredibly fast rate. This high throughput can support large-scale NFT projects and heavy user traffic.

**High
Throughput**

Scalability

Aptos's extensive web3 stack offers a plethora of tools and infrastructure for NFT creators. This includes smart contract platforms, developer tools, and decentralized applications, which can be used to build and enhance NFT platforms.

2.

3.

Aptos's bank-level security ensures the safety of NFT transactions. Its innovative reputation system automatically adjusts non-responsive verification nodes, offering a secure and reliable environment for NFT creators and traders.
